DETAILED ACTION

Response to Amendment

1. Applicant's response to the office action filed on September 11, 2007 has been entered. The claims pending in this application are claims 1-23 and 34-36 wherein claims 16-18 have been withdrawn due to species election made in the office action mailed on January 22, 2007. Rejection and /or objection not reiterated from the previous office action are hereby withdrawn in view of applicant's amendment filed on September 11, 2007. Claims 1-15, 19-24, and 34-36 will be examined.

Claim Objections

2. Claim 1 or 11 is objected to because of the following informality: "operations parts" should be "operation parts" in view of the specification.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. New Matter

Claims 1-15, 19-24, and 34-36 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled

Application/Control Number: 10/808,411

Art Unit: 1634

in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The recitation "said operations part comprises a piston member comprising a plunger extending from said second opening part side into said accommodation part" is added to the newly amended independent claims 1 and 11. Although the specification describes operation part (34) for easily operating the plunger (31) (see page 12, second paragraph), the specification fails to define or provide any disclosure to support such claim recitation. Furthermore, in applicant's remarks filed on September 11, 2007, applicant does not indicate which part in the specification supports such claim recitation.

MPEP 2163.06 notes "If NEW MATTER IS ADDED TO THE CLAIMS, THE EXAMINER SHOULD REJECT THE CLAIMS UNDER 35 U.S.C. 112, FIRST PARAGRAPH - WRITTEN DESCRIPTION REQUIREMENT. IN RE RASMUSSEN, 650 F.2D 1212, 211 USPQ 323 (CCPA 1981)." MPEP 2163.02 teaches that "Whenever the issue arises, the fundamental factual inquiry is whether a claim defines an invention that is clearly conveyed to those skilled in the art at the time the application was filed...If a claim is amended to include subject matter, limitations, or terminology not present in the application as filed, involving a departure from, addition to, or deletion from the disclosure of the application as filed, the examiner should conclude that the claimed subject matter is not described in that application." MPEP 2163.06 further notes "WHEN AN AMENDMENT IS FILED IN REPLY TO AN OBJECTION OR REJECTION BASED ON 35 U.S.C. 112, FIRST PARAGRAPH, A STUDY OF THE ENTIRE APPLICATION IS OFTEN NECESSARY TO DETERMINE WHETHER OR NOT "NEW MATTER" IS INVOLVED. APPLICANT SHOULD THEREFORE SPECIFICALLY POINT OUT THE SUPPORT FOR ANY AMENDMENTS MADE TO THE DISCLOSURE" (emphasis added).

- 5. The following is a quotation of the second paragraph of 35 U.S.C. 112:
 - The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 6. Claim 11 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Application/Control Number: 10/808,411 Page 4

Art Unit: 1634

7. Claim 11 is rejected as vague and indefinite in view of the phrase "wherein each independent pressure sensor is connected to each apparatus for separating and purifying nucleic acids". Since, before this phrase, the claim does not describe an independent pressure sensor, it is unclear why each independent pressure sensor can be connected to each apparatus for separating and purifying nucleic acids. Please clarify.

Conclusion

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

- 9. No claim is allowed.
- 10. Papers related to this application may be submitted to Group 1600 by facsimile transmission. Papers should be faxed to Group 1600 via the PTO Fax Center. The faxing of such papers must conform with the notices published in the Official Gazette, 1096 OG 30
